

FCC Staff,

I am in favor of sub-bands in the proposed new 60 meter amateur band.

Sub-bands should be created as 25% CW, 25% Digital and
50% Phone (AM & SSB).

Please limit power in all sub-bands to 250 watts PEP to help reduce
interference and to promote receiver & antenna optimization.

Please limit band use to General Class license and above.

John P. Russo KF2JQ
